Raising standards.

# CASE STUDY

## CLIENT: HERITAGE BUILDING & CONSERVATION

UK SYSTEM SCAFFOLD HIRE specialise in providing temporary public access staircases – but the request to incorporate a children's slide at historic Framlingham Castle in Suffolk was a first.

## PROJECT FRAMLINGHAM CASTLE SUFFOLK

The team at UK System Scaffold Hire has over 150 years combined experience in designing and managing projects using HAKI Access Systems, so it has to be a very unusual request to “be a first”.

## THE BEST ACCESS SOLUTION

Two 9.5m public access staircases were installed with minor modifications to protect important historic features of the 12th Century Fortress.

It was then that it was realised that the temporary staircases provided an opportunity to create a unique visitor attraction by adding a slide.

UKSSH had to keep the design compact, while at the same time creating a waiting area at the top of the slide and ensuring that the 6.5m high slide could curve around the temporary staircase, keeping clear of the scaffold buttress.

The solution was to move the entrance step to the opposite side of the staircase, adding an extra 1,655x1.655 bay and an entrance step going up to the first landing, meaning that only two 1.655m bays needed to be added on for a walk way and waiting area, this allowing the slide to sweep unhindered to the ground

## THE HIGHEST SAFETY STANDARDS

UK System Scaffold hire worked with Temporary Works and Design to provide a solution that met the highest safety standards to comply with regulations and delivering total peace of mind.

## DELIVERING NATIONWIDE

Just four days after the brief was given to UK System Scaffold Hire the equipment was on site and the erection completed.

## DELIVERING RESULTS

The project was completed in time for half term when hundreds of children grabbed the chance to slide down the wall of the ancient landmark – making English Heritage, not to mention lots of children, very happy indeed!

UK System Scaffold Hire specialises 100% in the hire of HAKI scaffold. No distractions. So you can be sure that we are 100% focused on ensuring that we get your project 100% right - every time
