

UKSSH ACCESS SOLUTIONS MAKE AIRCRAFT MAINTENANCE PLANE SAILING!

THE BEST ACCESS SOLUTION: The demise of Monarch Airways may have created headlines for the passengers whose holiday plans were affected, but it also created headaches for those responsible for maintaining the aircraft.

The Airline sector may deal in millions of pounds, but margins are tight and downtime is critical - and expensive. Monarch's planes had to be serviced and liveries changed as quickly and efficiently as possible.

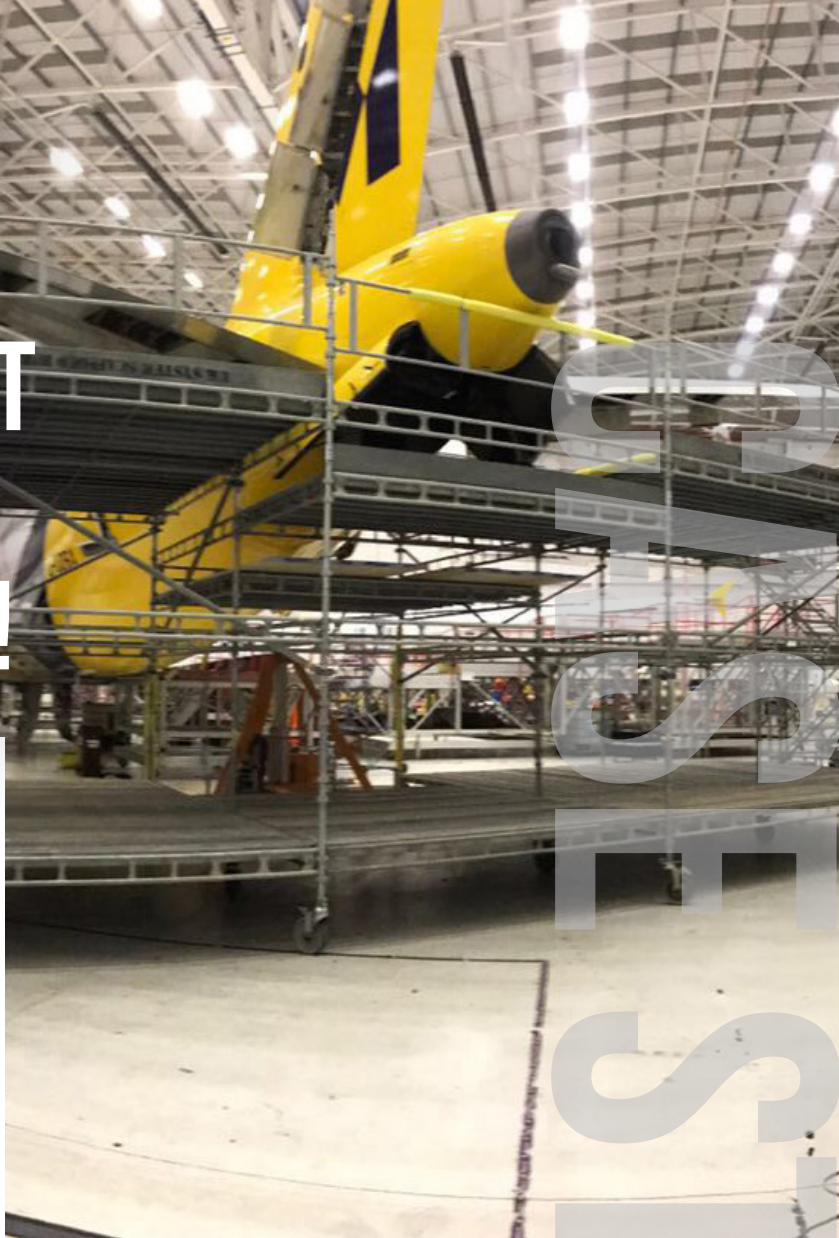

THE HIGHEST SAFETY STANDARDS: Working at airports requires compliance with the highest safety standards and a very neat and ordered system of work.

UKSSH designed and supplied mobile work platforms and staircases that could quickly and easily be adapted to provide safe access to all parts of the aircraft fuselage.

Effectively mobile birdcages, the platforms provided large, open grid sizes (3.05 X 3.05m) resulting not only in significant savings in components, but also ease of access and a much lighter structure making it much easier to push in to position.

DELIVERING NATIONWIDE: Fewer components keeps transport costs to a minimum – making UKSSH's mobile work platforms the ideal solution no matter where the airport.

DELIVERING RESULTS: UKSSH's mobile work platforms provide the lightest, safest and most time efficient access systems for the aerospace industry.
