

UKSSH HELPS DRIVE TRITON PROJECT SOLUTIONS TO THE TOP OF THE RANKINGS.

During the last few months UKSSH's expertise in providing temporary public access structures has helped Triton Project Solutions to supply and build Public Access Staircases for the British Masters at The Belfry, The Scottish Open, The BMW PGA Championship at Wentworth and The Portugal Masters at Vilamoura as well as stands for Lotus at The Goodwood Festival of Speed.

Triton Project Solutions may appear to be rookies in the world of supplying infrastructure support for major sporting events (after all, the Company was only launched in April 2021), but they have already clocked up an impressive list of account wins – including a three-year contract with golf's elite European Tour (now known as the DP World Tour).

While Triton Project Solutions is a new name, the company's Business Development Manager, Willy Irish, certainly isn't – in the last 30 years he has built a reputation as a specialist in supplying temporary event structures for everything from golf tournaments, motor racing and rugby to festivals and World summits.

Willy's relationship with UKSSH goes back nearly a decade and he cites UKSSH's proven track record for delivering the highest standards of

service as a key reason for their mutual success: "Supplying access solutions for high profile events represents the apex of our industry – everything must be perfect, from delivering on time and guaranteeing the highest safety standards to the aesthetics of the structures.

"That's why we rely on UKSSH to supply our Public Access Staircases whether it's for a few steps up to an exhibition stand or very impressive designs providing multiple access levels to double tier Hospitality Structures.

"UKSSH fully understand the legal requirements to deliver Public Access Staircases for national and international events – their designs are fully compliant, with colour-coded non-slip nose-grips and double DDA handrails, even anti-climb cladding if required.

"Their yard management is key, too: They ensure that they only use genuine Haki components which is vital if you want to meet the highest compliance requirements; you can rely on UKSSH to clean and maintain components so that they are perfect when delivered to site – essential to ensure that our stands always look smart, and they deliver the correct materials on site, on time, every time – which is
