

UKSSH HELPS LTC SCAFFOLDING MAINTAIN IMPRESSIVE GROWTH.

GASE STUDY

“It isn’t just the headline grabbing contributions that keep projects on track – sometimes it’s getting the small details right that makes you appreciate the importance of a business relationship” comments Simon Wall of LTC Scaffolding.

LTC Scaffolding is enjoying a purple patch: It is involved in a vast range of prestige projects across Greater London - and that level of activity means that they needed to strategically supplement their own scaffolding stock: In particular, they needed stair towers ... and lots of them.

UKSSH are Haki hire specialists that only supply genuine Haki components and hold extensive stocks at their two operating depots in Tamworth and Chesterfield.

LTC knew that UKSSH could be relied on to answer their needs.

“On the face of it, asking Haki hire specialists to supply stair towers is a simple decision, but beyond the basic question of whether they had sufficient stock levels (which, of course, they did) there were other equally important considerations that made us chose UKSSH” Simon explains.

“As with many busy companies, sometimes our requests to UKSSH involved very tight deadlines and our requirement to have several individual towers for different sites loaded on the same vehicle gave UKSSH some logistical challenges. The fact that they responded proactively and labelled towers to ensure they were delivered to the correct sites and responded within the time frames was great testament to them and their service levels.

“In a very challenging period for the industry, when steel prices are rising and supply of equipment is becoming a real problem, I can always depend on UKSSH to supply us, leaving us free to concentrate on what we do best - giving our clients the very best service possible”.
