

POOLING IDEAS DELIVERS A NOVEL SOLUTION.

UK System Scaffold Hire and Tamworth Scaffolding have a long track record of working together to deliver innovative, cost-effective solutions.

And it isn't just the highest, longest or most dramatic projects that deliver memorable results.

When Tamworth Snowdome undertook a total refurbishment of its 25 metre swimming pool it included painting the roof and beams above the pool.

Tamworth Scaffolding and UKSSH pooled their expertise to devise a means of providing safe, easy access for contractors to the entire roof without the need for a large (and costly) birdcage.

Using the Haki components that they usually employ on temporary rolling roofs, Tamworth Scaffold designed and built a rolling platform that delivered both the access and containment characteristics required to complete the project quickly, efficiently and cost effectively.
