

WWSA AND UKSSH RECEIVE GLOWING PRAISE FOR THEIR INITIAL PROJECT

"I would like to give you all a very big thank you for a really professional job with our purchase of used HAKI scaffold: Everything went extremely well, the service was outstanding and the quality of the material was just perfect.

"I would recommend Worldwide Scaffold and Access Ltd to all I know in the scaffold business and for sure we will contact you again for future purchases.

Thanks again and just 5 stars for you". - Anders Friis, CEO, Friis Scaffolding AB.

International scaffolding management specialists, Worldwide Scaffold and Access Limited and UK System Scaffold Hire completed their first project together with the shipment of four articulated lorry loads of Haki Universal System Scaffold to Northern Europe – and the service provided by the partnership met with glowing praise from WWSA's client, Friis Scaffolding AB of Sweden.

Tony Stevens, Managing Director of WWSA, which offers a scaffold and access design, supply and training service to an international clientele, complemented the ease of dealing with UKSSH, praising their "can do" attitude and attention to detail.

Gary Griffiths, MD of UKSSH commented that this latest collaboration was evidence of how his company's reputation and client base had grown over the last ten years: "When we started the company, UK System Scaffold Hire described precisely what we did, but over the years not only has the sale of genuine Haki scaffold become an increasingly important part of our business in response to customers' requests for a "mix and match" combination of hire and sales, we have also developed an international client base in Europe and the United States".
