- Suspended Scaffold
- Haki Stair Towers
- Loading Towers

Buy or hire with

At UKSSH we are passionate about the advantages of using Haki Systems.

Whether you choose to BUY or HIRE Haki System Scaffold from us, develop a partnership with UK System Scaffold Hire and we can help you to lower project costs and raise profitability.

confidence

From concept... to design... to trial erections... to training... to delivery, UKSSH are there to support you every step of the way. With over 150 years of collective knowhow and experience, substantial stocks and a commitment to excellence, you can trust UKSSH to get it right every time.

UKSSH'S Service and product range is designed to combine versatility with unrivalled performance.

Infrastructure

Rail, road and waterway projects benefit from UKSSH's unrivalled expertise, huge stocks of genuine Haki products and innovative solutions.

From public access temporary staircases and temporary bridges to devising sealed scaffolding designs that enable hydro demolition and construction activities to be carried out over a live motorway.

Public access temporary bridges

- Clear spans up to 30 metres.
- Fully systemised.
- Lightweight but strong construction.
- Quick and simple to erect.
- Safe working loads up to 7.5kNm² can be achieved.

Events

UKSSH has supplied temporary public access solutions for some of the UK's largest festivals and some of Britain's most prestigious historic buildings - as well as overseas events such as the European Golf Tour.

Clients know that they can rely on UKSSH to deliver fully compliant, innovative solutions on time, every time: We have devised new products to overcome unique challenges - and even designed a slide to turn scaffolding into a tourist attraction.

Public access temporary staircases

- The Haki Public Access Staircase provides safe, fast and efficient public access.
- Safe working loads up to 7.5kNm can be achieved.
- Unique tamper proof locking devices ensure maximum safety.
- All components are ergonomically designed for safe and easy installation.
- Double DDA handrails, GRP steps and landings and solid treads means that The Haki Public Access Staircase is fully compliant with the strictest safety standards.

Weather prote

Temporary work shelters

- Create the perfect controlled environment for outdoor projects where temperature or humidity control is essential.
- Provides effective containment of by-products and debris.
- Built to any length in 3.05m modules and can cater for any width.
- Quick to install.
- Available as a static or mobile unit and can be crane-lifted into place.

Temporary buildings

- Tailored to your exact requirements.
- Quick to erect in even the most demanding conditions, designed to quickly overcome problems such as uneven or sloping sites.
- A full design and erection service is available.
- Civil engineering base works can be eliminated.

ction

Temporary roofs

- Provides maximum protection against the elements and helps to contain hazardous materials.
- Features totally safe erection methods using collective fall prevention.
- Up to five times faster to install than traditional structures.
- Versatile, compatible with all types of scaffolding and adaptable with a choice of ridged, mono-pitch or polygonal roofs.
- Can accommodate planned and unplanned openings to the work area as required.

Haki Stairs

Site Stair Towers

- Available with UKSSH Security Gate System.
- Using genuine Haki components can be built to heights over 160 metres.
- 3.05m x 1.65m footprint.
- The unique Haki hook-on design increases the speed of erection.
- Non-slip treads and landings.

Compact Stair Tower

- Designed for sites where space is at a premium.
- With a footprint of 2.5m x 1.25m the Haki Compact Stair Tower can fit into small spaces.
- Equally as adaptable as its larger cousin the traditional Stair Tower, side and end exits are possible.
- Non-slip treads and landings.
- Integrated toe board system.

UKSSH Security Gate System

Fits all Haki stairs including staggered and in-line standards, Mark 2 Stairs and Public Access

- Quick, easy and safe to install.
 - Robust.
- Totally enclosed security system.
- Lockable from both sides of the gate.
- Cladding panel can accommodate signage and advertising.
 - Hire or buy.

HAKI Systems

Heavy duty supports

- Leg loads of up to 200kN can be achieved: The Haki Tripod is designed for really demanding scaffolding jobs where leg loads are high.
- Haki Tripod Heavy Duty Supports have a footprint less than 200mm x 200mm.
- They allow various spacings up to 3 metres wide to provide free access to shops and public entrances.
- They can be laced together with Haki system or tube and fittings.
- Formed spigots provide a full load bearing connection between uprights thus eliminating the need to use costly tube and fittings.
